## **Inzenius™ Partners with V2verify™ to Add Voice Biometrics to Their Time and Attendance Solution**

Omaha, NE (November 28<sup>th</sup>, 2018) – V2verify™, the industry-leading user authentication and identity management provider, is pleased to announce Inzenius™ has partnered with them to offer voice authentication to their time and attendance solution.

Inzenius is a leading provider of Human Resource and Capital Management Solutions (HRM/HCM) in Australia and New Zealand. They pride themselves on using innovative technology to provide their customers with the best user experience possible. According to Russell Bode, Inzenius' Innovation Leader, adding a voice authentication technology to their time and attendance solution will provide their customers with a more streamlined and secure time clock management process, while cutting down on time clock fraud.

"We're excited to be working with V2verify", said Russell Bode. "We are impressed with their user authentication and identity management solution; It supports our mission to be responsive to our customer's ever-changing human capital requirements. V2verify will also play a key role in future product innovations."

"Offering solutions that address HRM and HCM business challenges are at the heart of Inzenius' business model, and we're honored they selected V2verify's biometric and AI technology to be part of their product's roadmap," said Damian De Rozairo, V2verify CEO.

### **About V2verify**

V2verify is a patented, omnichannel voice authentication and identity management solution that can authenticate a user with 2-seconds or less of natural speech. V2verify has a built-in "liveness" aware feature that prevents the use of hi-fidelity voice recordings and a voice file that cannot be reverse-engineered.

### **About Inzenius**

Inzenius provides an HRM Payroll Rostering Time & Attendance HCM in one fully integrated package, servicing over 400 customers in Australia and New Zealand.
